

Microblading Treatment/Before and Aftercare Instructions

All permanent makeup procedures are multi-session processes.

An Initial application is incomplete until after a follow-up appointment, which should be scheduled approximately 6–8 weeks after your initial appointment. There will be an additional charge for the follow-up appointment after your initial application if it is not included in your service price. First follow up is recommended to be performed within 3 months of the initial application, any appointment scheduled after that will be charged full price.

Two or three applications may be required to achieve the desired results. It is not uncommon to lose up to 70% of the color on the first application,

WHILE YOUR SKIN HEALS, BE PREPARED FOR THE COLOR INTENSITY OF YOUR PROCEDURE TO BE SIGNIFICANTLY LARGER, SHARPER, BRIGHTER OR DARKER than what it is expected for the final outcome. This is normal and expected result of the application and healing process. The healing process will take a number of days to complete, depending on how quickly the outer layer of your skin exfoliates and new skin regrows to take its place.

BEFORE THE TREATMENT:

- DO NOT take Aspirin, Niacin, Vitamin E or IBuprofen 24 hours before the procedure
- DO NOT drink coffee, alcohol or energizing drinks the day of the procedure
- If you usually get your brows tinted to camouflage gray hair, do at least 1 week prior to the permanent makeup procedure
- DO NOT tan or sun bathe 30 days prior to procedure
- DO NOT wax 2–3 days before prior to procedure
- DO NOT have any chemical peels, dermabrasions, mesotherapy, or any other intense treatments that cause faster skin cell rejuvenating and/or cause skin irritation 3–4 weeks prior to procedure

-
- DO NOT get Botox done 4–6 weeks prior to procedure
 - DO NOT use Retin-a/Retinoid 7 days prior to procedure
 - DO NOT use Accutane 10–12 months prior to procedure

AFTER THE TREATMENT:
